Red Bull Technology Limited

Strategic Report for the Year Ended 31 December 2024

The directors present their strategic report for the year ended 31 December 2024.

Principal activity

The Group's principal activity during the year was the design, manufacture and management of Formula One ("F1") activities.

Review of the business

The period has been marked by continued performance on-track, operational excellence at the teams Technology Campus, and financial stability within shareholder budgets and the financial regulations. The Groups achievements reflect the culmination of strategic and financial investments in technology, innovation, and team development by the shareholders, demonstrating their continued commitment to the team. This investment has continued throughout the period, with the development of a state-of-the-art wind tunnel facility commencing.

The directors consider exceptional on-track performance, evidenced by race and championship wins, strong strategic and commercial partnerships and a controlled cost base to be the principal Key Performance Indicators to assess progress towards strategic goals. Success in the above manifests itself in strong Group revenues from both prize money and sponsorship.

Following the unparalleled success of the previous season, the 2024 season started with a statement of intent. A 1-2 finish in Bahrain whilst leading every lap, continuing the dominance from 2023. Victory in China marked the 100th pole position for the team since its arrival in Formula One. Following the promising start, the rest of the season proved challenging on-track, with the performance gains made by our competitors resulting in a three-way fight for the Championship. The second half of the season did not yield the same level of success and from Baku on-ward, the team were surpassed in the Constructor standings. The season culminated in a 4th Drivers World Championship for Max Verstappen and a 3rd place finish in the Constructors Championship for Oracle Red Bull Racing (ORBR).

2024 has been another strong year for the ORBR Commercial Team, securing record sponsorship revenues as the team prioritised securing long-term financial sustainability, focusing on longer, larger partnerships with established businesses that align with ORBRs ethos and culture.

Welcoming brands such as VISA to the Group, existing partnerships were also expanded, including a record-breaking apparel partnership in Formula One for both size and duration with Castore and significant commitments from AT&T, Tag Heuer and Exxon to long-term agreements. This commercial success, together with the increases in prize money, have resulted in turnover rising from £446.2m in 2023 to £491.7m in 2024.

2024 saw ORBR's inaugural F1 Academy championship season, a women's only category to promote an exciting and emerging young female talent in motorsport. As the primary sponsor for one of the teams, ORBR has been able to leverage its portfolio and introduce 6 brands to F1 Academy.

ORBR continued to invest in its Simulation Racing team, with 2024 resulting in Frederik Rasmussen clinching the 2024 Formula One Sim Racing World Championship after an exciting year of racing.

During the period, Red Bull Technology continued to provide Red Bull Group companies with engineering and manufacturing services permitted under the applicable FIA regulations.

Increases in the cost base are primarily driven by the costs associated with the servicing of the increased partner portfolio, restructuring of operations and investment in the expanded Technology Campus capabilities.

The Group's turnover amounted to £491,714,000 (2023 - £446,202,000), an increase of 10%.

Red Bull Technology Limited

Strategic Report for the Year Ended 31 December 2024 (continued)

Principal risks and uncertainties

Competitive Risks

The Group's principal risk is the level of financial contribution the Group receives for the racing programme. Contributions are dependent upon the underlying performance of the Group's racing activities, which has been strong in recent years. Any risk is mitigated by entering into long and medium term contracts with our commercial partners and continuing to invest in research and development to ensure continued successful on track performance.

Legislative Risks

The Group operates in the exciting, dynamic but challenging environment of Formula One. The principle rule maker in the sport is the FIA. Teams actively participate in regulatory discussions with new regulations being agreed with sufficient lead time for teams to make the necessary adaptations. Therefore the risk is minimised through involvement and timescale. In 2021, the FIA introduced Financial Regulations capping the relevant spend on Formula One activities. Management carry out regular assessments of cost against both the cap and forecasts to ensure compliance with the above.

Financial Instrument Risks

As part of the review, the directors have considered the exposure of the Group to liquidity risk and foreign exchange risk, in order that an overall assessment can be made of the Group's assets, liabilities, its financial position and its results for the year. The Group treasury procedures mean that risks are managed accordingly and as a result there is not considered to be a material risk.

Exposure to price, credit, liquidity and cash flow risk

The Group is funded through its retained profits and intercompany balances. The directors actively consider other sources of funding to ensure that the Group has sufficient available funds for its operations.

The Group is exposed to macro-economic risk, e.g. inflation and currency fluctuation and has foreign currency transactions denominated in EUR, USD and other currencies. The Board reviews and agrees policies for managing risks arising from the Group's operations.

Cyber Security

Effective processes are in place to mitigate any risks and the IT infrastructure is constantly maintained and updated.

Red Bull Technology Limited

Strategic Report for the Year Ended 31 December 2024 (continued)

Section 172(1) statement

Engaging with Stakeholders

The directors have considered the long-term benefits for the Company and its stakeholders throughout many of the decisions made by the board. Before taking decisions, the board will review information which is gathered specifically to ascertain the key effect of the decision in the short and longer term. The following are examples of areas where long term strategy for the benefit of the Company and its members is considered: human resource, infrastructure and technology.

Employee involvement

The Group's policy is to discuss and consult with employees on matters likely to affect their interests. Information on matters of concern to employees is provided through regular reports and bulletins which seek to achieve a common awareness on the part of all employees of the financial and economic factors affecting the performance of the Group.

Disabled employees

It is the Group's policy to offer equal opportunities to disabled persons, whether registered or not, who apply for job vacancies, having regard to their aptitudes and abilities in relation to the jobs they apply for.

Employees who become disabled whilst in the Group's employment will be retained in employment wherever possible and will be given help with any necessary rehabilitation and training.

Customers and suppliers

Promoted by the directors, the Company actively fosters good business relationships with its customers, suppliers and others. Through various initiatives, the Company closely partners these stakeholders to meet their needs which in turn benefits the Company. This includes a framework of corporate governance to manage anti-bribery, anti-corruption, supply chain management, responsible sourcing and supplier audits.

Community

The business has been based in Milton Keynes for more than 20 years, through that period Milton Keynes has been an excellent location to conduct business, train and retain personnel. Therefore, the business location and the communities nearby are an important consideration in decision making. The directors have continued to work closely with the council and maintain relationships with neighbouring businesses. For example, the business has considered the impact of commuters on the environment. The business has taken decisions to increase onsite parking, offering cycle to work, electric vehicle charging and car sharing as some of the actions to help minimise the commuter impact in Milton Keynes.

Corporate Governance

The directors uphold the companies code of conduct throughout their work in order to maintain and develop the highest standards of business conduct.

The directors act fairly through their communications with staff throughout the business at all levels, this is in accordance with and sets the standard for the values and processes embedded throughout the corporate governance.

Approved and authorised by the Board on 30 January 2025 and signed on its behalf by:

A Rew
Director

Red Bull Technology Limited

Directors' Report for the Year Ended 31 December 2024

The directors present their report and the financial statements for the year ended 31 December 2024.

Directors of the Company

The directors who served the Company during the year were as follows:

A Rew

C Horner

Results and dividends

The Group profit for the year after taxation amounted to £13,810,000 (2023 - profit of £11,027,000).

No interim dividends were paid in the year (2023 - £50,000,000). The directors do not recommend a final dividend.

Research and development

The Group's research and development costs are in relation to competing in the FIA Formula One World Championship.

Employment of disabled persons

It is the Group's policy to offer equal opportunities to disabled persons, whether registered or not, who apply for job vacancies, having regard to their aptitudes and abilities in relation to the jobs they apply for.

Employees who become disabled whilst in the Group's employment will be retained in employment wherever possible and will be given help with any necessary rehabilitation and training.

Employee involvement

Our objective is to cultivate a rewarding workplace that fosters the growth and prosperity for all our employees. Open lines of communication with the team, utilising both digital platforms and in-person meetings, facilitates the dissemination of pertinent business information. This includes data related to financial and economic influences on the Company's performance, as well as initiatives aimed at promoting employee engagement. Our organisation enjoys robust employee advocacy, characterised by strong engagement and retention rates, which contribute to our culture of high performance.

Red Bull Technology Limited

Directors' Report for the Year Ended 31 December 2024 (continued)

Future developments

At the end of the 2024 season, the team announced a change in the ORBR driver line-up for 2025, with Liam Lawson, a product of the Red Bull driver development program, replacing Sergio Perez.

For 2026, FIA Technical, Sporting and Financial Regulations are due to be updated. These changes make 2025 a key transitional year, with focus shifting onto the design and development of the new chassis and the integration of the new Power Unit, designed, developed and manufactured in house by Red Bull Powertrains 2026 Ltd.

Auditor

In accordance with s.487 of the Companies Act 2006, Ernst & Young LLP are deemed reappointed as auditor of the Group and Company.

Disclosure of information to the auditor

Each director has taken steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that the Group's auditor is aware of that information. The directors confirm that there is no relevant information that they know of and of which they know the auditor is unaware.

Red Bull Technology Limited

Directors' Report for the Year Ended 31 December 2024 (continued)

Streamlined Energy & Carbon Reporting (SECR)

Red Bull Technology Limited is committed to sustainability, energy targets and objectives, aimed at striving for Net Zero emissions and addressing the environmental impact of our activities.

As part of our commitment to sustainability, we will target action through our DRIVE sustainability policy:

- Deliver continual improvement across our activities and management systems, with regular reviews of our resources and practices to deliver our objectives and targets.
- Reduce emissions by minimising consumption through responsible procurement and design of energy efficient processes and equipment, and utilising renewable energy.
- Integrate sustainable practices across our operations to protect the environment, prevent pollution, minimise waste, target climate action, and safeguard the natural environment.
- Verify our compliance with legal standards, best practice working methods, and the needs and expectations of our stakeholders.
- Engage our network to encourage collaboration towards shared goals through the transparent disclosure of our performance and activities.

Executive Summary:

In 2024, Red Bull Technology Limited saw a 1.4% (291,873 kWh) increase in energy consumption and a 1.7% (71 tCO₂e) increase in greenhouse gas emissions, compared to 2023, when measuring against the SECR mandatory reporting boundaries.

Despite this increase in absolute emissions and energy usage, the tCO₂e per employee intensity ratio has decreased 19.3%.

Energy Efficiency Actions Taken:

Red Bull Technology Group is committed to continuing our journey towards Net Zero decarbonisation, both as a group and within the wider sport. The group is also subject to SBTi aligned corporate targets, as a subsidiary of Red Bull GmbH, and as part of our ongoing efforts.

Main achievements since 2019 include:

- Purchasing of Green Electricity, since October 2020.
- Sitewide lighting upgrade to LED lighting.
- Responsible offsetting through Gold Standard.

Main achievements during 2024 include:

- Certification in ISO14001 Environmental Standard.
- Continued FIA 3* Sustainability Accreditation.
- Increased people resource of the sustainability department.
- Purchased Sustainable Aviation Fuel (SAF) certificates for a segment of race air freight.
- Reduced diesel usage by using HVO biofuel for EU race hospitality generators.
- Investments made in facilities energy efficiency partnerships and projects.
- Undertaken the Red Bull Technology Group's first carbon footprinting assessment to cover all company activities and emissions reporting scopes.

Red Bull Technology Limited

Directors' Report for the Year Ended 31 December 2024 (continued)

SECR Calculation Boundary:

In accordance with the 2019 Regulations, SECR reporting boundaries include assets owned or controlled within the UK only, as defined by the operational control boundary. Mandatory disclosures include the energy use and associated GHG emissions of:

- Scope 1 - Direct gas energy combustion in owned facilities (operated the UK).
- Scope 1 - Direct fuel combustion in owned vehicles (completed in, started in, or ending in the UK).
- Scope 2 - Electricity used in owned facilities (operated the UK).
- Scope 3 - Fuel used in employee or rental vehicles, otherwise known as grey fleet (started in and/or ending in the UK).

Methodology Used:

This report was compiled internally by Red Bull Technology Limited. The 2019 UK Government Environmental Reporting Guidelines was followed to ensure the Streamlined Energy and Carbon Reporting (SECR) requirements were met, and exceeded where possible. Reported results here includes UK and Offshore activities only.

2024 was the first iteration of a full carbon footprint calculation, covering all company activities and emissions reporting scopes. Emission data was calculated following the GHG Protocol Corporate Standard, using an operation control approach. Best available activity data was used, with the majority of data points being quantity-based, and spend-based used only where necessary. All emissions in this report were calculated using the 2024 UK Governmental GHG Conversion Factors for Company Reporting, provided by the Department for Energy Security and Net Zero (formerly DEFRA / BEIS).

Annual Energy Use and GHG Results:

	2024	2023
Scope 1 Facilities Gas Energy Consumption (kWh)	2,741,032	2,510,820
Scope 1 Transport Fuel Consumption (kWh)	897,890	699,983
Total Scope 1 Consumption (kWh)	3,638,922	3,210,803
Scope 1 Facilities Gas Energy Emissions (tCO ₂ e)	515	471
Scope 1 Transport Fuel Emissions (tCO ₂ e)	213	158
Total Scope 1 Emissions (tCO₂e)	728	629
Brown Electricity Consumption (kWh)	17,039,782	17,187,243
Green Electricity Purchase (kWh)	15,591,150	-
Total Scope 2 Emissions (Location-based) (tCO₂e)	3,528	3,559
Total Scope 2 Emissions (Market-based) (tCO₂e)	300	-
Employee Mileage Claims (kWh)	11,216	-
Total Scope 3 Emissions (Mandatory) (kWh)	12	10
Total Emissions (Location-based) (tCO₂e)	4,268	4,198
Total Emissions (Market-based) (tCO₂e)	1,040	-

Red Bull Technology Limited

Directors' Report for the Year Ended 31 December 2024 (continued)

Intensity Ratio:

Red Bull Technology Limited has chosen to adopt the commonly recognised intensity ratio of 'tCO₂e / headcount'. The number of employees related to UK operations only to align with the energy and emission reporting boundary. The metric is considered the most relevant to the Red Bull Technology Group's energy consumption activities and provides a comparison of performance over time and across different organisations and sectors.

	2024	2023
tCO ₂ e per employee (tCO ₂ e/e)	<u>5</u>	<u>6</u>

Going concern

The financial statements are prepared on a going concern basis as the directors believe there will be sufficient cash available to meet liabilities as and when they fall due during the period of assessment to 12 months from date of signing the accounts. The Company's ultimate parent undertaking, Red Bull GmbH, confirmed to the directors that it has no plans or intentions to discontinue the provision of sponsorship income within the next 12 months from the date of signing and will not request the repayment of intercompany loans unless the Company has the facilities to repay them. The directors have examined the financial position of the parent undertaking and have satisfied themselves that this support would be available if required. Business and cashflow forecasts have been prepared to assess the financial position of the Group and the directors have reviewed the basis of these projections in arriving at the above conclusions in accordance with the requirements of ISA (UK) 570.

Approved and authorised by the Board on 30 January 2025 and signed on its behalf by:

A Rew
Director

Red Bull Technology Limited

Statement of Directors' Responsibilities

The directors acknowledge their responsibilities for preparing the Annual Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Group and the Company and of the profit or loss of the Group for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Group's and the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Group and the Company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Group and the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Red Bull Technology Limited

Independent Auditor's Report to the Members of Red Bull Technology Limited

Opinion

We have audited the financial statements of Red Bull Technology Limited ('the Parent Company') and its subsidiaries (the 'Group') for the year ended 31 December 2024 which comprise the Consolidated Statement of Income, the Consolidated Balance Sheet, the Company Balance Sheet, the Consolidated Statement of Changes in Equity, the Company Statement of Changes in Equity, The consolidated Statement of Cash Flows and the related notes 1 to 25, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards including FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" (United Kingdom Generally Accepted Accounting Practice).

In our opinion, the financial statements:

- give a true and fair view of the state of the Group's and the parent Company's affairs as at 31 December 2024 and of the Group's profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the group in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Group and Parent Company's ability to continue as a going concern for a period of 12 months from the date of signing the accounts.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Group's ability to continue as a going concern.

Red Bull Technology Limited

Independent Auditor's Report to the Members of Red Bull Technology Limited (continued)

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Opinion on other matter prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the Strategic Report and Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the Strategic Report and Directors' Report have been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the Group and the Parent Company and its environment obtained in the course of the audit, we have not identified material misstatements in the Strategic Report or Directors' Report.

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the Parent Company financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Responsibilities of directors

As explained more fully in the Directors' Responsibilities statement [set out on page 11], the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or the Parent Company or to cease operations, or have no realistic alternative but to do so.

Red Bull Technology Limited

Independent Auditor's Report to the Members of Red Bull Technology Limited (continued)

Auditor Responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below:

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Company and determined that the most significant are United Kingdom Accounting Standards, FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", Companies Act 2006, Data Protection Act 1998, Health and Safety at Work Act 1974, the FIA Formula One Regulations (Sporting, Technical & Financial), Tax Law, Furlough law.
- We understood how Red Bull Technology Limited is complying with those frameworks by holding enquiries with those charged with governance. We understood the potential incentive and ability to override the internal controls. We considered management's attitude and tone from the top to embed a culture of honesty and ethical behaviour whereby a strong emphasis is placed on fraud prevention which may reduce opportunities for fraud to take place. We further understood the adoption of accounting standards and consider the compliance with the above laws.
- We assessed the susceptibility of the Group and Company's financial statements to material misstatement, including how fraud might occur by obtaining and reading internal policies, holding enquires of management and those charged with governance and the in-house legal counsel as to any fraud risk framework within the entity.

Based on this understanding we designed our audit procedures to identify noncompliance with such laws and regulations. Our procedures involved:

- Enquiry with management and those charged with governance as to any fraud risk framework within the entity;
- Enquiry with management and those charged with governance and in-house legal team around actual and potential litigation and claims;
- Auditing the risk of management override of controls, including through testing of manual journal entries and other adjustments for appropriateness;
- Agreeing the revenue recognised to contracts, including sponsorship agreements, and vouching a sample of invoices through to cash receipt;
- Understanding the performance obligations detailed in the contracts and considered management's revenue recognition;
- Agreeing the internal sponsorship revenue to the underlying cost-plus calculation and vouching a sample of cost-plus invoices through cash receipt;
- Evaluating the business rationale of significant transactions outside the normal course of business;

Red Bull Technology Limited

Independent Auditor's Report to the Members of Red Bull Technology Limited (continued)

- Challenging judgements made by management. This included corroborating the inputs and considering contradicting evidence;
- Reading financial statement disclosures and testing to supporting documentation to assess compliance with applicable laws and regulations.

A further description of our responsibilities is available on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Red Bull Technology Limited

Notes to the Financial Statements for the Year Ended 31 December 2024

1 Accounting policies

Company information

Red Bull Technology Limited is a limited liability company incorporated in England. The registered office is Red Bull Technology Campus, Stewart Building, Bradbourne Drive, Tilbrook, Milton Keynes, MK7 8BJ.

Accounting convention

The Group's financial statements have been prepared in compliance with FRS 102 as it applies to the financial statements of the Group for the year ended 31 December 2024.

The financial statements are prepared on a going concern basis, under the historical cost convention and in accordance with applicable accounting standards in the United Kingdom and the Companies Act 2006. The financial statements are prepared in sterling which is the functional currency of the Group and rounded to the nearest £'000.

The consolidated financial statements incorporate those of Red Bull Technology Limited and all of its subsidiaries (i.e. entities that the Group controls through its power to govern the financial and operating policies so as to obtain economic benefits).

The Company has not presented its income statement as permitted by section 408 of the Companies Act 2006.

The profit for the year is £12,129,000 (2023 - £9,731,000).

In accordance with FRS 102.33.1A, the Group has taken the exemption to not disclose related party transactions where those transactions are with a wholly owned member of the Group.

Going concern

The financial statements are prepared on a going concern basis as the directors believe there will be sufficient cash available to meet liabilities as and when they fall due during the period of assessment to 12 months from date of signing the accounts. The Company's ultimate parent undertaking, Red Bull GmbH, confirmed to the directors that it has no plans or intentions to discontinue the provision of sponsorship income within the next 12 months from the date of signing and will not request the repayment of intercompany loans unless the company has the facilities to repay them. The directors have examined the financial position of the parent undertaking and have satisfied themselves that this support would be available if required. Business and cashflow forecasts have been prepared to assess the financial position of the Group and the directors have reviewed the basis of these projections in arriving at the above conclusions in accordance with the requirements of ISA (UK) 570.

Turnover

Turnover represents sponsorship and promotional income, prize money, bonus payments, income from design, manufacturing, event hospitality, income from investment properties, marketing services, support services and contributions towards the race programme received and receivable net of value added tax. In certain cases, the Company enters into agreements with suppliers whereby goods and services are received in exchange for the provision of various sponsorship and marketing activities. Investment property income has been assessed within the year and has been reclassified from Other Income to Turnover. Management's assessment has determined which revenue streams should be considered as the Company's ordinary activities.

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received, excluding discounts and rebates.

Red Bull Technology Limited

Notes to the Financial Statements for the Year Ended 31 December 2024 (continued)

1 Accounting policies (continued)

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer (usually on dispatch of the goods), the amount of revenue can be measured reliably, it is probable that the economic benefits associated with the transaction will flow to the entity and the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Government grants

Government grants including research and development expenditure credit are recognised at the fair value of the asset received or receivable when there is reasonable assurance that the grant conditions will be met and the grants will be received.

Tangible fixed assets

Tangible fixed assets are initially measured at cost and subsequently measured at cost or valuation, net of depreciation and any impairment losses.

Depreciation

Depreciation is recognised so as to write off the cost or valuation of assets less their residual values over their useful lives on the following bases:

Asset class	Depreciation method and rate
Freehold buildings	20 to 50 years
Office and workshop equipment	3 to 15 years
Motor vehicles	3 to 10 years

The gain or loss arising on the disposal of an asset is determined as the difference between the sale proceeds and the carrying value of the asset, and is recognised in the profit and loss account.

Fixed asset investments

In the parent company financial statements, investments in subsidiaries are initially measured at cost and subsequently measured at cost less any accumulated impairment losses.

Impairment of fixed assets

At each reporting period end date, the Group reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Stocks

Stocks are stated at the lower of cost and net realisable value.

In respect of raw materials, consumables and racing spares, and race cars in the course of construction, cost is defined as purchase price. In the case of racing spares and race cars in the course of construction, costs also include an appropriate proportion of production overheads based on the normal level of activity. Work in progress is valued based on the cost of direct materials and labour plus attributable overheads.

Cash and cash equivalents

Cash and cash equivalents are basic financial assets and include cash in hand, deposits held at call with banks, other short-term liquid investments with original maturities of three months or less, and bank overdrafts.

Red Bull Technology Limited

Notes to the Financial Statements for the Year Ended 31 December 2024 (continued)

1 Accounting policies (continued)

Equity instruments

Equity instruments issued by the Group are recorded at the proceeds received, net of transaction costs. Dividends payable on equity instruments are recognised as liabilities once they are no longer at the discretion of the Group.

Taxation

The tax expense represents the sum of the tax currently payable and deferred tax.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the profit and loss account because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the reporting end date.

Deferred tax

Deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the statement of financial position date where transactions or events have occurred at that date that will result in an obligation to pay more, or right to pay less or to receive more, tax, with the following exceptions:

- Provision is made for tax on gains arising from the revaluation (and similar fair value adjustments) of fixed assets, or gains on disposals of fixed assets that have been rolled over into replacement assets, only to the extent that, at the statement of financial position date, there is a binding agreement to dispose of the assets concerned. However, no provision is made where, on the basis of all available evidence at the statement of financial position date, it is more likely than not that the taxable gain will be rolled over into replacement assets are sold.
- Provision is made for deferred taxation that would arise on remittance of the retained earnings of subsidiaries, associates and joint ventures only to the extent that, at the statement of financial position date, dividends have been accrued as receivable.
- Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the statement of financial position date.

Provisions

Provisions are recognised when the Group has a legal or constructive present obligation as a result of a past event, it is probable that the Group will be required to settle that obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the reporting end date, taking into account the risks and uncertainties surrounding the obligation. Where the effect of the time value of money is material, the amount expected to be required to settle the obligation is recognised at present value. When a provision is measured at present value, the unwinding of the discount is recognised as a finance cost in profit or loss in the period in which it arises.

Employee benefits

The costs of short-term employee benefits are recognised as a liability and an expense, unless those costs are required to be recognised as part of the cost of stock or fixed assets.

Red Bull Technology Limited

Notes to the Financial Statements for the Year Ended 31 December 2024 (continued)

1 Accounting policies (continued)

The cost of any unused holiday entitlement is recognised in the period in which the employee's services are received.

Termination benefits are recognised immediately as an expense when the Company is demonstrably committed to terminate the employment of an employee or to provide termination benefits.

Retirement benefits

Payments to defined contribution retirement benefit schemes are charged as an expense as they fall due.

Leases

Rental income from operating leases is recognised on a straight line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight line basis over the lease term.

Foreign exchange

Transactions in foreign currencies are recorded at the rates of exchange prevailing at the dates of the transactions. At each reporting end date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at the rates prevailing on the reporting end date. Gains and losses arising on translation in the period are included in profit and loss.

Research and development expenditure

Research and development expenditure is charged to the profit and loss account as incurred, except that development expenditure incurred on an individual project is capitalised as an intangible asset when the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete the asset and the ability to measure reliably the expenditure during development.

Operating leases

Rental income from operating leases is recognised on a straight line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight line basis over the lease term.

Red Bull Technology Limited

Notes to the Financial Statements for the Year Ended 31 December 2024 (continued)

1 Accounting policies (continued)

Judgements and key sources of estimation uncertainty

In the application of the Group's accounting policies, the directors are required to make judgements, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised where the revision affects only that period, or in the period of the revision and future periods where the revision affects both current and future periods.

Intangible assets

Intangible assets acquired separately from a business including digital assets are recognised at cost and are subsequently measured at cost less accumulated amortisation and accumulated impairment losses.

Intangible assets acquired on business combinations are recognised separately from goodwill at the acquisition date where it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity and the fair value of the asset can be measured reliably; the intangible asset arises from contractual or other legal rights; and the intangible asset is separable from the entity.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually, and whenever there is an indication that the asset may be impaired.

2 Turnover and other revenue

Turnover, which is stated net of value added tax, represents income derived from the continuing ordinary activities of the Group as described in more detail in note 1 to the financial statements. All amounts arise in the United Kingdom.

3 Other operating (expense)/income

The analysis of the Group's other operating income for the year is as follows:

	2024 £ 000	2023 £ 000
Rental income	-	1,728
Miscellaneous other operating income	35	280
Exchange differences apart from those arising on financial instruments measured at fair value through profit or loss	(278)	(155)
	<u>(243)</u>	<u>1,853</u>

Red Bull Technology Limited

Notes to the Financial Statements for the Year Ended 31 December 2024 (continued)

4 Operating profit

Arrived at after charging/(crediting)

	2024 £ 000	2023 £ 000
Depreciation of owned tangible fixed assets	14,097	14,089
Research and development cost	<u>129,737</u>	<u>131,719</u>

Above the line tax credit recognised in the year £25,947,499 (2023: £22,609,154).

5 Other interest receivable and similar income

	2024 £ 000	2023 £ 000
Interest income on bank deposits	<u>259</u>	<u>159</u>

6 Loss on disposal of fixed assets

	2024 £ 000	2023 £ 000
Gain on disposal of intangible assets	2,377	-
Loss on disposal of tangible assets	(4,458)	(6,324)
Changes in the fair value of investment properties	<u>54</u>	<u>-</u>
	<u>(2,027)</u>	<u>(6,324)</u>

Red Bull Technology Limited

Notes to the Financial Statements for the Year Ended 31 December 2024 (continued)

7 Staff costs

The aggregate payroll costs (including directors' remuneration) were as follows:

	2024 £ 000	2023 £ 000
Wages and salaries	102,940	84,319
Social security costs	20,772	10,293
Pension costs, defined contribution scheme	3,063	2,414
	<u>126,775</u>	<u>97,026</u>

The average monthly number of employees, including directors, during the year was made up as follows:

	2024 No.	2023 No.
Racing and production	418	404
Administration	272	199
Design	279	184
	<u>969</u>	<u>787</u>

8 Directors' remuneration

The directors' remuneration for the year was as follows:

	2024 £ 000	2023 £ 000
Remuneration	<u>8,911</u>	<u>9,621</u>

Remuneration disclosed above includes the following amounts paid to the highest paid director:

In respect of the highest paid director:

	2024 £ 000	2023 £ 000
Remuneration	8,032	8,915
Company contributions to money purchase pension schemes	<u>6</u>	<u>4</u>

Red Bull Technology Limited

Notes to the Financial Statements for the Year Ended 31 December 2024 (continued)

9 Auditors' remuneration

	2024 £ 000	2023 £ 000
Audit of these financial statements	88	86
Audit of the financial statements of subsidiaries of the company pursuant to legislation	77	76
	<u>165</u>	<u>162</u>
Other fees to auditors		
Audit-related assurance services	85	85
All other non-audit services	156	90
	<u>241</u>	<u>175</u>

Red Bull Technology Limited

Notes to the Financial Statements for the Year Ended 31 December 2024 (continued)

10 Taxation

Tax charged/(credited) in the consolidated statement of income

	2024 £ 000	2023 £ 000
Current taxation		
UK corporation tax	4,835	3,802
UK corporation tax adjustment to prior periods	(1,393)	1,453
	<u>3,442</u>	<u>5,255</u>
Deferred taxation		
Arising from origination and reversal of timing differences	2,233	-
Arising from write-down or reversal of write-down of deferred tax asset	-	1,014
Total deferred taxation	<u>2,233</u>	<u>1,014</u>
Tax expense in the income statement	<u>5,675</u>	<u>6,269</u>

The Pillar 2 disclosure is available in the ultimate parent undertakings, Red Bull GmbH, group financial statements.

The tax on profit before tax for the year is higher than the standard rate of corporation tax in the UK of 25% (2023 - average rate of 23.5%)

The differences are reconciled below:

	2024 £ 000	2023 £ 000
Profit before tax	<u>19,485</u>	<u>17,296</u>
Corporation tax at standard rate	4,871	4,065
Effect of revenues exempt from taxation	-	(10)
Effect of expense not deductible in determining taxable profit (tax loss)	1,981	634
Deferred tax expense relating to changes in tax rates or laws	-	50
(Decrease)/increase in UK and foreign current tax from unrecognised temporary difference from a prior period	(1,393)	1,453
Tax increase from effect of capital allowances and depreciation	-	77
Other tax effects for reconciliation between accounting profit and tax expense	<u>216</u>	<u>-</u>
Total tax charge	<u>5,675</u>	<u>6,269</u>

Red Bull Technology Limited

Notes to the Financial Statements for the Year Ended 31 December 2024 (continued)
